Douille pour bougies de prechauffage extra longue

Pair of extra deep 3/8" sockets in 10mm and 12mm single Hex (6pt) profile. Designed to reach heavily recessed fixings, including those found on bumper, rear lamp and door hinge fittings. The six-sided socket head drives from the flats to provide more torque, useful for freeing seized nuts & bolts, whilst avoiding the risk of rounding. The socket has slightly convex internal faces and drilled out corners, for a solid grip, even on damaged fastener heads. Quality sockets manufactured from chrome plated chrome vanadium, a very useful set for car servicing and maintenance.

Additional Information

- 2 douilles extra longues de 120 mm avec un Entraînement en 3/8"
- Utilisation courant sur des bougies de préchauffage lorsque l'accès est restreint
- Utilisation courante sur de long boulons, comme par exemple sur les pare chocs, les optiques arrieres, les gonds de portieres, etc…
- 2 tailles : 10mm et 12mm
- Fabrication en chrome Vanadium ,avec une platine en chrome
