

Magnetic & Flexible Claw Pick-Up Tool 2pc

Pair of pick-up tools offering both magnetic and grab claw options, suitable for retrieving nuts, bolts, and small components from hard to access areas, such as engine bays and other confined spaces. Both tools have long-reach, 600mm flexible shafts, the grab claw has an easy use pump-action hold and release mechanism whilst the magnet tool has a non-slip handle. A useful workshop set that can pick up both ferrous and non-ferrous components.

Additional Information

- Pair of pick-up tools: magnetic & 4-pronged claw.
- The set can retrieve ferrous & non-ferrous objects.
- 27mm x 24mm x 12mm. Magnetic head.
- Flexible shaft length: 600mm.
- Provide two different ways for retrieving components in deep engine bays or confined spaces.
