

Wiper Arm Removal Tool

For the removal of stubborn wiper arms. Suitable for spline taper and taper spigots.

Additional Information

- Width: 17mm (fixed); Reach: 27mm.
- Tapered feet thickness: 1 - 2mm.
- Screw thread and hook feet. Sized for difficult access.
- IMPORTANT: Ensure the threaded bar is well lubricated with molybdenum disulphide grease before use.
- Note: The knob should not need forcing. If it does, the wiper may need lubricating or gently heating or tapping to remove it from the spindle.
