

Steel Band for CV Boot 2pc

Steel banding for securing a new CV boot. It is important to fix a new CV boot securely to prevent it loosening with use. Steel bands are the strongest, most consistent way to ensure a proper fixing. The bands are strong enough to hold a high tension and have locking tab ends for a firm grip once tightened. Use these bands with Laser CV Dust Boot Clamp Installer with Cutter (Part No. 2916), for simple and effective CV boot maintenance.

Additional Information

- Banding for securing the new CV boot once in place.
- Steel band designed for high tension use.
- Band size: 550mm long x 6.3mm wide.
- Use in conjunction with Laser CV Dust Boot Clamp Installer with Cutter, Part No. 2916.
