

Telescopic Stainless Steel Mirror 6.3 X 2.5cm

Telescopic inspection mirror with long, narrow lens, 63mm x 25mm, for excellent visibility and easier access in restricted areas. The long-reach shaft extends from 228mm to 717mm and the mirror head can be angled for the best view, offering good visibility of concealed and deep-set areas. The mirror has a durable stainless-steel frame and a slim profile soft grip handle, making this an excellent mirror for workshop and garage use, ideal for under vehicle and engine bay inspection.
