

Cooling System Pressure Test Kit

A comprehensive coolant system pressure testing kit for universal use. Locates system leaks from header/expansion tanks and fittings, head gasket, radiator core, heater matrix, water pump, hoses, pipes and etc.

Additional Information

- 25 pieces, including 17 individually sized threaded adaptors, pressure testing pump with gauge, 2 connectors for pressure testing bayonet style caps and an adaptor cap wrench.
- Adaptors have quick-release couplings and pump is fitted with large, easy to read dial clearly marked in both psi and bar.
- Thermometer included for temperature measurement of radiator cores and expansion tanks etc.
- Also checks the leakage on original radiator cap.
- All caps available separately.
