

Drain Pan for 205L Barrels

Drain pan designed to fit a standard 205 litre (44 gallon) oil drum. The pan fits snugly around the drum rim and aligns with the barrel inlet for fast, efficient drainage. The pan is 550mm diameter and 105mm deep, there is a built-in filter to prevent contamination and it is manufactured from oil and chemical resistant polythene. A simple and effective solution for draining waste oil from filters etc.

Additional Information

- Oil drain pan designed for use with or 205L (45 gallon) drums.
- Capacity 20L & 600mm diameter.
- Designed to align with barrel inlet for ease of draining. Prevents oil contamination.
- Manufactured from chemical resistant high density polythene.
- Smaller oil drum bottle & filter drain basin also available. Please see Part no. 6034.
