

Valve Grinding Sticks with Paste

Complete valve grinding kit includes a pair of double-ended valve lappers and a tin of fine/coarse lapping paste. The lapping sticks have rubber end cups shaped to stick to the valve for accurate manual lapping of the valve head. The coarse 80 grit paste has a fast cutting action to clean through rust and deposits quickly whilst the fine 220 grit paste leaves a refined finish. A simple and effective way to remove surface defects, corrosion and deposits from the valve head to ensure a perfect seal.

Additional Information

- Pair of valve lapping tools with both fine and coarse grinding paste for manual engine valve lapping.
- Four cup diameters: 16, 20, 29 and 35mm fit a wide range of valve heads.
- Grinding sticks have shaped wooden handles for comfort and ease of use. Stick lengths: 210 and 230mm.
- 110g tin of grinding paste - coarse (80 grit) and fine (220 grit). A fast cutting, non-drip silicon carbide and lithium based formula manufactured in the UK.
- The paste and grinders are also available separately, please see Part No. 2561 and Part No. 3524.
