

Coil Puller - for BMW

Ignition coil puller for BMW motorcycles, allows the easy removal of the coils without damage.

Additional Information

- BMW R1100, R1150 pencil coils only (up to 2003) plus BMW R850 (with pencil coils) & BMW R259 engines with single spark ignition systems.
- Equipped with a cross drilling to allow application of additional force using a suitable bar - simply slide on & pull.
- Manufactured from lightweight Aluminium.
- Note: these pencil style coils should not be removed with pliers as they can easily be damaged.
