

Digital Inclinometer

Digital Inclinometer equipped with a built-in magnetic base, designed for measuring angles on metal and other surfaces.

Additional Information

- Ideal for angle measurement for areas such as: suspension setting of camber and caster, setting bumper mounted radar units used in vehicle collision avoidance and parking assist systems.
- Also suitable for Citroën and Peugeot variable valve timing setting/checking; angle checks for comparison and setting on any flat surface. Plus level checks on vehicle body alignment equipment during crash repair.
- Ideal for use as a digital camber/caster gauge when paired with the Gunson Trakrite Camber Bar (Part No. 77137).
- Equivalent to PSA OEM 1376-A.
- Requires AAA battery (included). CE & UKCA compliant.
