

Flameless Hot Air Blower

Flameless hot air blower for use with all heat shrink tubes. A light and compact tool with a pistol grip and a thumb press on/off switch for comfortable hand held use. A slide regulator sets the temperature so the blower can be adjusted to deliver the right level of heat for the job. The nozzle has a diameter of 10mm to deliver a gentle heat that is perfect for working with heat shrink tubes. The kit also includes a useful starter set of commonly used heat shrink sleeves.

Additional Information

- Instant electronic ignition with a refillable tank with see-through window. Also stable catalytic heating system.
- Light, compact, design. Dimensions 110 x 27 x 85mm. Net weight 68g. Run time 20 - 25 mins approx (at mid setting).
