

Mini Ratcheting Brake Pipe Cutter 4.75mm

Automatic mini pipe cutter with ratchet handle for quick, clean brake pipe cutting. The compact head, ratcheting handle and self-adjusting cutting mechanism is designed for use in confined areas. The comfort grip handle provides extra leverage over standard cutters and there is a 1/4" drive square in the base if more pressure is required. The cutter head features an automatic spring mechanism to maintain the correct cutting pressure on the pipe at all times for a much quicker cut compared to conventional cutters. An excellent tool for brake pipe servicing and maintenance.

Additional Information

- Ratcheting, self adjusting mini brake pipe cutter ideal for restricted access.
- Compact head, only 15mm radius with a 4.75mm (3/16") cutter designed specifically for brake pipes.
- Automatic, self adjusting head & ratchet handle for faster cutting. Quick & accurate operation, ideal for under vehicle use.
- Extra leverage due to handle length over standard cutter. To further increase leverage use the 1/4" drive square in the end of the handle.
- Spare cutting wheel available, Laser Part No. 61279.
