

Brake Pipe Corrosion Tool 400mm

A specialist tool that safely removes dirt and corrosion from brake pipes before inspection. Extended length (400mm), with 30° angled head for inspecting hard to reach areas. The curvature of the two scraper notches matches the brake pipe diameter to avoid damaging the pipes whilst scraping. A unique, patented design that enables the user to inspect brake pipes easily, ideal for MOT and servicing requirements. A quality tool manufactured from stainless steel with a cushioned handle.

Additional Information

- Extended length brake pipe corrosion assessment tool, with 30° angled head for hard to reach areas.
