

Anti-Static Service Mat Kit

This static-dissipative mat is designed to be used as a work surface when handling sensitive electronic devices and components without the risk of causing damage through electrostatic discharge (ESD). The durable vinyl mat features two integral storage pockets and two 10mm studs for attaching the earth leads. Supplied in a vinyl storage pouch.

Additional Information

- Portable ESD service kit, for use when working on sensitive electronics without causing damage through electrostatic discharge.
- Kit includes: vinyl static-dissipative mat with 2 integral pockets, vinyl storage pouch, adjustable wrist band with coiled earth lead and 3m long straight earth lead.
- Size of mat: 600 x 600mm. Size of storage pouch: 245 x 245mm.
- Surface resistivity: 10e8 to 10e10 Ohms/Sq (10⁸ to 10¹⁰). Complies with ANSI/EOS/ESD S4.1.
- Earth bonding plug available separately, see Laser Part No. 8315.
