

Engine Timing Tool Kit - for VW Group CR Diesel

Developed for the 1.2, 1.4, 1.6 and 2.0L common rail diesel engines found across the Volkswagen Group range of vehicles, Laser 8362 offers the minimum tools required to allow the user to lock these engines into their "timed" position for the safe removal and replacement of the camshaft drive belt or to perform engine timing checks.

Additional Information

- Engine applications: 1.2, 1.4, 1.6 and 2.0L common rail diesel engines found across the VW group ranges.
- Audi, Seat, Skoda and Volkswagen CR engines (from 2012). For complete applications please see kit instructions.
- Tools equivalent to OEM T10492 and T10490.
- Use in conjunction with OEM instructions; EU Registered Design and made in Sheffield.
- For a more comprehensive kit which includes tensioner hex keys and HP fuel pump sprocket holding tool, please see Laser Part No. 6809.
