

Portable Heat Gun 300W

A lightweight heat gun suitable for automotive use providing enough volume of hot air to shrink larger size shrink wrap such as in loom repairs. It has a maximum temperature of 350°C which it reaches in just 5 seconds and features an ABS body with a stainless steel fold down stand to act as a rest during cool down. The narrow body and matt finished grip make it easy to handle and focus the heat precisely where it is needed. This heat gun is also perfect for hobbyists, modellers, arts and crafts.
