

Universal Pedal Depressor

An extendable stay that can be adjusted and set to depress and hold a vehicles brake, clutch or accelerator pedal down by using the steering wheel of drivers seat to keep it in place. Allows one man operation when checking brake lights, as well as being able to hold the throttle at a set RPM when checking emissions etc. Ideal for garages, service centres and mobile mechanics.

Additional Information

- Depresses and holds car and truck brakes, clutches or accelerator pedals.
- The stepless extendable design allows the mechanic to adjust the tool to required position.
- The U-shaped steel bracket can be placed on the steering wheel or drivers seat.
- Extendable range: 521 - 851mm.
- Rubber coated foot and vinyl dipped bracket provide improved grip and avoid marking vehicle interior.
