

Thread Chaser For NOx Sensor Ports M22 x 1.5

Thread chaser for M22 x 1.5 sensor ports often used for NOx (Nitrogen Oxide sensors). Designed to allow the user to clean out and repair the sensor port thread prior to fitting the new sensor.

Additional Information

- Applications include: Mercedes-Benz, Vauxhall/Opel NOx sensor port threads.
- For use on any M22 x 1.5 thread. Total length: 50mm.
- Fitted with rubber O-ring to help hold the chaser in a suitable spanner or socket.
- Always use with grease to help catch the dirt as well as protect the sharpness of the tool.
- Use with 7/8" (22mm) sockets or spanners. Manufactured from chrome vanadium with black phosphate finish.
