

NOx Sensor Tap Set 2pc

A short series tap set to restore exhaust sensor port threads including NOx (Nitrogen Oxide sensors) prior to fitting the new sensor, ideal for use in tight areas. Manufactured from chrome molybdenum with a Titanium-Nitride coating for hardness, rust resistance and longevity.

Additional Information

- Applications include: Ford EcoBlue, Mercedes-Benz & Vauxhall/Opel.
- Set includes: M20 x 1.5 & M22 x 1.5 thread. Total length: 48mm.
- Manufactured from TiN (Titanium Nitride) coated chrome molybdenum.
- Use with axle grease for clean threads and to catch any removed metal in the flutes.
- For Ford fuel vaporiser please see Laser Part No. 8332.
