

Pocket Gas Torch

A light and compact butane gas powered torch with piezo electric ignition. It features a safety lock, to prevent accidental ignition, together with a flame lock to allow for continuous use. The refillable gas tank has a 12ml capacity, giving it run time of 20 – 30 minutes and a maximum temperature of 1300°C. Suitable for use at the workshop, at home and in the garden, for a wide range of tasks.

Additional Information

- Mini blow torch, with refillable tank, ideal for a wide range of jobs including heating small components for removal & soldering components where a soldering iron cannot be used.
- Safety lock & flame lock (for continuous use); 20 - 30 mins run time (approx).
