

Butane Hot Air Blow Gun

A butane gas powered hot air blower with piezo electric ignition. It features a safety lock, to prevent accidental ignition, together with a flame lock to allow for continuous use. The refillable gas tank has a 30ml capacity, and can only be refilled by removing it from the gun to prevent accidental ignition. It has a run time of 40 – 60 minutes and a maximum temperature of 600°C. Suitable for use at the workshop, at home and in the garden, for a wide range of tasks.

Additional Information

- Butane powered hot air gun, with piezo electric ignition & built in safety stand, suitable for a wide variety of tasks including heating seized components & paint-stripping.
- Safety lock & flame lock (for continuous use); 40 - 60 mins run time (approx).
