

Pivot Bush Removal/Installation - SAF

Designed to allow the SAF suspension pivot bush (3D bush) to be removed and fitted with the same tool set.

Additional Information

- Applications include: SAF-Holland Intradisc Plus & Intradisc Plus "IO" & "IU" 3D pivot bushes.
- Bush numbers covered include: OE 4 177 3028 00, Febi Bilstein 40590 & MEYLE 66-34 032 0001.
- Ensure the bush orientation is noted before the removal of the old bush.
- Clean & lubricate the bush & housing before removing the old & fitting the new bush. The bush manufacturers recommend P80 rubber assembly lubricant.
- Force screw must be lubricated with molybdenum disulphide grease. NOTE: Do not use impact tools.
