

Locking Adjustable Wrench 250mm

An adjustable wrench, 250mm in length, featuring a grip wrench style locking mechanism, that adjusts from 0-30mm. Squeezing the grip loads the parallel jaws and locks them into place, clamping around the fastener and providing a tighter grip than a standard adjustable wrench. Ideal for use on stubborn or rounded fasteners.

Additional Information

- Locking mechanism enables increased grip on fasteners.
- Length: 250mm (10").
- Range: 0 - 30mm.
- Manufactured from carbon steel, drop forged & heated treated, with a corrosion resistant finish.
- Suitable for use on stubborn or rounded fixings.
