

Manual Fluid Extractor 10L

A manually operated vacuum fluid extractor with a 10 litre capacity. It is suitable for extracting all types of lubricating oils used in cars, motorcycles, marine engines and stationary engines. It is also suitable for non-corrosive low viscosity fluids such as water and has numerous additional applications such as draining cisterns, fish tanks, sinks, etc

Additional Information

- Suitable for engine oil, ATF, coolant, brake fluid, water & other low viscosity fluids.
- Capacity: 10L. Dimensions: 695mm x 220mm x 220mm.
- Uses manually pumped vacuum for fluid extraction.
- Provided with a 10mm \square x 1m main tube/adaptor, plus 3 additional tubes (5mm, 6mm & 8mm \square) which are used in conjunction with the main tube/adaptor.
- 6L capacity manual fluid extractor is also available, please see Laser Part No. 9019.
