

Air Impact Wrench 1"D with 6" Anvil

A composite outer bodied 1" drive air impact wrench, with extended anvil (output shaft) for recessed wheel nut access and user convenience, much lighter in weight than other industry models. These features make it much more user friendly, and less tiring to use, ensuring optimum health and safety for the worker. Ideal solution in HGV wheel replacement, vehicle repair, fleet maintenance, heavy plant, construction and agriculture.

Additional Information

- 2170Nm maximum torque, with an unrivalled nut busting 3526Nm & 7,000 RPM.
- Working torque: 1763Nm (1,300 ft-lb) at 5 seconds. Loosening torque: 3526Nm (2,600 ft-lb) at 25 seconds.
- Noise level: 98.5dB. Air consumption: 7cfm. Weight: 4.6Kg. Length: 520mm.
- Features a magnesium alloy body, square drive fitted with spring clip, twin hammer mechanism & side exhaust.
- Air inlet: 3/8" BSPT. Air inlet pressure: 90psi.
