

Oil Funnel Kit with Drain Storage Station

This set combines the Laser oil funnel kit (Part No. 7980) with the new oil drain station (Part No. 9113), specifically designed to provide a clean, tidy and convenient way to store the funnel kit after use, allowing the components to drain off any excess oil so it drains in to a suitable 1L oil bottle for periodic safe disposal. The funnel set is supplied with nine colour-coded caps, sized for common vehicle makes and models, together with an angle adaptor for tight spaces and a lid to limit dirt getting inside the engine. Features a 1100ml capacity, 90mm diameter bottle style funnel for fast-filling and a screw cap design that forms a tight seal to the engine for a cleaner, hands-free re-fill.

Additional Information

- Oil funnel kit, Part No. 7980, features 9 different sized caps suitable for oil ports of the majority of vehicles. Angle adaptor is included which is ideal for working in tight spaces.
- Applications: Toyota, Lexus, Scion (yellow cap); Honda, Nissan (green cap); Subaru (red cap); Volvo, Ford, Mazda (light blue cap); Mercedes-Benz, BMW, VAG (maroon cap); Toyota (orange cap); Mazda (grey cap); Audi, VAG (brown cap); Kia, Hyundai (dark blue cap).
- Threaded, rubber seal caps provide a secure connection to the tank for convenient hands-free operation. Funnel features a protective lid, limiting dust, as well as providing safe storage for components when not in use.
- Supplied with Laser Tools oil drain station, Part No. 9113, designed to ensure excess oil from the funnel kit components drains in a controlled manner into an empty standard 1L oil bottle (not supplied).
- Mounts vertically on a flat vertical surface using magnets or screw holes provided. Station manufactured in the UK. UK Registered Design.
