

Absorbent Spill Sock 120cm - for Oils

The Laser 9221 is an absorbent spill sock, which is a flexible tube, that can be used around oil spillages to absorb and prevent the spread of the oil. Also ideal for moulding around the bottom of leaking machinery and preventing liquids from escaping onto pedestrian areas.

Additional Information

- Oil absorbent roll designed to form a barrier & control fuel spills, oil spills & machinery spillages etc. to prevent them from spreading.
- Size: 1200mm long, 76mm diameter.
- NOTE: Absorbent capacity approximately 6.4L per piece.
- Contaminated spill socks must be disposed of in accordance with local authority regulations.
- General purpose spill kit also available, please see Laser Part No. 9222.
