

## Pneumatic Brake Bleeder & Fluid Extractor

A pneumatic fluid extractor that features a 2L vacuum bottle equipped with a hard Nylon probe to allow access to tight spaces for fluid extraction using workshop air. Perfect for difficult to get to master cylinder reservoirs and low viscosity oils found in power steering pumps etc.

### Additional Information

- Supplied with a brake bleed adaptor to allow use for vacuum bleeding from the callipers/slave cylinders etc.
- With 4mm (I/D) by 1000mm long silicon hose & 4mm (I/D) x 600mm long rigid Nylon pipe.
- Equipped with hands free trigger clip.
- The hard Nylon pipe makes extracting brake fluid from difficult to access reservoirs easy.
- NOTE: Requires the use of workshop air to generate the vacuum.
