

Wireless 12/24V Towing Circuit 2-In-1 Tester Set

A 2-In-1 diagnostic kit that allows the user to check and test both the vehicle tow socket and trailer light functionality. The battery-powered, wireless design makes it perfect for one-person operation, allowing for quick and efficient checks without assistance.

Additional Information

- Battery-powered, works with both 12V & 24V vehicle systems.
- Designed to work with both conventional & CANBUS systems.
- Works with both 7 & 13 pin systems.
- Ideal for car & light commercial vehicle towing systems.
- Supplied in a strong & durable blow mould case for storage. Ideal for mobile use.
