

Wireless 12V Towing Circuit Tester

A diagnostic kit that allows the user to check and test the vehicle tow socket functionality while sitting in the vehicle. The wireless design makes it perfect for one-person operation, allowing for quick and efficient checks without assistance.

Additional Information

- Works with 12V vehicle systems (for 24v vehicles, please see Laser Part No. 9179).
- Designed to work with both conventional & CANBUS systems.
- Works with both 7 & 13 pin systems.
- Suitable for 12V car & van towing systems. Ideal for owner drivers of tow cars, camper vans, caravans, trailers & race support vehicles.
- Supplied in a soft-shell case for storage.
