

Macpherson Strut Spring Compressor - 1.5 Tonne

The new Laser 9234 spring compressor is hydraulically operated which offers ease of control and more accurate pressure management than found with pneumatic systems. This is a stand-alone unit which does not require air or electric connections. The 9234 is equipped with a very strong and stable base.

Additional Information

- Designed for vehicle coil springs with a wire diameter from 12 - 18mm & minimum spring coil diameter of 120mm. Suitable for both left & right-hand wound springs.
- Ram stroke: 580mm, with compression range of 175mm. Max. compressive force: 1,500kg.
- 4x additional spring shoes & clamps included.
- Equipped with very strong safety cage.
- Also features a pressure gauge with over pressure safety valve. NOTE: Do not exceed 1160psi (80 bar).
