

## Towing Hitch Weight Checker

For the safety of the vehicle driver, other road users, and to meet legal requirements, use Laser 9248 for an instant weight check of the cargo being towed. With a weight gauge ranging from 50 to 100kg, it will quickly tell you if the cargo is distributed evenly and within the towing vehicles criteria.

### Additional Information

- Simply place it under the towing hitch while you retract the support (jockey) wheel to read the measurement.
- Total height: 425mm. Base dimension: 40 x 40mm. Weight: 380g.
- Weight capacity: 50 - 100Kg. Measurement indicators: 50, 75 & 100Kg.
- Strong durable material & lightweight for easy storage.
- For use on trailers & caravans.
