

## Transparent 0.3mm Insulating Shroud 1000V - 1m<sup>2</sup>

An addition to the Laser Tools electrical shrouding range, the Laser 9287 1m<sup>2</sup> shroud is manufactured from a thinner 0.3mm transparent material while maintaining 1000V protection from electrocution. Ideal when working over or around live connections that need to be covered as well as seen.

### Additional Information

- Protects technicians & engineers from live voltages up to 1000V.
- Easily installed & fitted.
- Dimensions: 1000 x 1000mm; Thickness: 0.3mm; Weight: 0.8kg.
- Insulated safety clamps are recommended to ensure shroud remains in place, please see Laser Part No. 6618, 9245 & 9246.
- For thicker (0.5mm) transparent insulated shrouding, please see Laser Part No. 6676.
