

## Brake & Clutch Pressure Bleed Kit inc Master Cylinder

The Laser Tools 9315 pressure bleeder kit offers complete portability with multiple power options: mains, 12V, or its own detachable 21V rechargeable battery. The kit includes 16 precision-machined aluminium brake bleed adaptors and is also compatible with Laser Tools' existing range of brake bleed caps.

### Additional Information

- For maximum portability, this brake bleeder has been designed to take fluid direct from fluid bottles.
- Features easily adjustable pressure from 0 to 50psi (3.5 bar). Uniquely powered by one of three sources: 230V mains, a 12V supply, or a detachable rechargeable 21V battery.
- Kit includes: alligator clip connection (12V source), together with a 230V 3-pin standard UK mains plug & cable to charge the 21V battery or provide direct power for the machine.
- 1x quick coupling, 2x fluid bleed bottles (2 wheels at once), 16 brake cylinder adaptors for European & Japanese vehicles. Also compatible with Laser Tools brake master cylinder adaptor caps.
- Safe for use with DOT 3, 4, 4+ & DOT 5.1 brake fluids. Auto shut-off when empty. CE & RoHS approved.
